4.B. The S.L.O. was exceeded in all areas except for Differentiated Instruction and Assessing Student Projects.

4.C. In EDU 606, Designing an Interdisciplinary Unit, the target population will achieve a minimum of 85% on each indicator for Interdisciplinary Rubric.

4.C. There were ten indicators in the Interdisciplinary Unit: Topic or Theme Choice (97%); Scan and Cluster (91%); Selection of Broad-based Standards (97%); Construction of Know/Do/Be (BD) Umbrella (91%); Construction of Web (82%); Big Understandings Answer Big Questions (71%); Creating Big Questions (88%); Description of Big Assessment Task (94%); Task Specific Rubric (97%) and Unit Relevance (90%).

4.C. The S.L.O. was exceeded in all areas save Construction of Web (82%) and Big Understandings Answer Big Questions (71%). This is a significant improvement over the last year’s assessment. Students were having trouble articulating the difference between topical and concept-based models of curriculum and instruction. I began using a hands-on activity at the first "face to face" meeting where students were divided into groups of four or five. The small groups were given a container with Play-Doh and a card which included a statement. The groups were to read the statement and then create an image with the Play-Doh that represented the image. The groups had different statements. Statement #1: A bird has a beak. Statement #2: Life forms are equipped with the tools needed to survive. After creating the different images, the groups had to guess what the other groups had created. Once all statements were disclosed, a discussion took place about how one statement was a fact and the other was an enduring understanding. This led into the difference between a topical and concept-based model of curriculum.
and instruction. Students were also having trouble developing a horizontal and vertical scan and cluster, so I demonstrated how to take hard copies of the State Frameworks for each subject being integrated in the Unit Design and use highlighters to determine the objectives in each subject area that could be taught as a unit. Then I incorporated a small group activity where teachers were given hard copies of three subject areas for a grade level out of the State Framework, and were instructed to use highlighters to determine which objectives in each subject could be taught as a unit. This helped the teachers understand the process.

The rubric will contain such information but not limited to articles from scholarly/peer reviewed publications, summary, critiques, and APA format.

4.C. Eighty percent of the students in EDU 620 will be able to write a methodology for a research proposal using a rubric and obtaining a minimum of 80 out of 100 points. The rubric will contain such information but not limited to APA format, permissions, participants, instruments, design, data collection & analysis, and procedures.

4.D. In EDU 636, Reading and Writing Across the Curriculum, teacher candidates in the M.A.T. program will achieve a mean score of 3.5 when being assessed for Scholarly Writing. These scores will be compared to the data from EDU 611.

5.A. As measured by the “Designing an Interdisciplinary Unit” rubric, teacher candidates in EDU 640 “Curriculum Planning”, will achieve a mean score of 3.5 (4 point Likert scale) when developing an interdisciplinary unit covering the indicators: Identified Topic, Topical Theme, Identified Concepts, Five Disciplines, Unit Overview, Generalizations, Guiding Questions, Culminating Performance Task, and Lesson Plan.

5.A. The S.L.O. (3.5) was not met in five of the nine indicators: Identified Topic 4.00; Topical Theme 3.25; Identified Concepts 3.63; Five Disciplines 3.25; Unit Overview 3.38; Generalizations 3.13; Guiding Questions 3.63; Culminating Performance Task 2.88; One Less Plan 3.88. The overall mean was 3.45.

5.A. The S.L.O. will be continued during the 2011-2012 academic year. This course is required in the alternate route program and the general education program. It shows a significant decline in performance scores when alternate route (first year teachers) are aggregated into the data. This is a key assessment and will be continued.

5.B. Due to the percentage of students obtaining more than the minimum of 80 out of 100 points, these procedures and their criteria will remain as a key assessment in scholarly writing for 2011-2012.

5.B. Approximately 82% met the criteria for this key assessment.

4.C. Approximately 65% of the students met the minimum rubric criteria.

4.C. Approximately 65% of the students met the minimum criteria. Students are encouraged to redo assignments for a better grade based on feedback from the instructor. Students are also encouraged to meet with the instructor prior to submission and may redo after returned with feedback. With combined criteria (weighted procedures), almost 88% of the students received an A or B in the class. The criteria will remain the same for 2011-2012.

4.D. The target population achieved an overall average of 3.70 (goal 3.5) on a 4 point Likert scale with only one individual indicator score below 3.5 (Citations in Text – 3.42).

4.D. The instructor made major adaptations in the Winter and Spring terms which allowed the S.L.O. goals to be met in all areas save citations in text. The S.L.O. will be maintained for the 2011-2012 academic year in support of our school learning objective for scholarly writing.

4.D. Approximately 65% of the students met the minimum criteria.
